review
Letter review
Numbers review

READ ALOUD: I Know it is Fall, Max and Ruby's Leaves "Fall", Letter Tales, Number Tales, Daddy Could You Buy Me an Elephant?, green eggs and ham, weekly reader Let's Vote: Election Count Down, elephants, Elmer, Number Tales, Pumpkins, There Was An Old Lady Who Swallowed a pie

Vocabulary/Sight Words: Fall Seasons, sign language, Spanish sight words, letter of the week words

Letter of the week: Letter Ee
Number 5

Math: sorting, number identification, sequencing, patterns, comparing, graphing, longest, shortest

Science: tactile discrimination, outdoor fall nature walk, experiments, counting pumpkin seeds, Parts of a Pumpkin, Life Cycle of a Turkey

Author of the Month: Anne Rockwell
Parts of the book
ie: author, illustrator, dedication page, and spine

Special Happenings

Election day Tuesday!

**We are closed on
10/3.**

Parent Info: We did a great visual science experiment with some math also. We talked about what a predication was as well as what hypothesis means. All we needed for the experiment were a few ingredients. We used hot water, oil, vinegar and seltzer as our potential solvents. We placed candy corns in each of the solvents and started the timer. We then observed what happened to the candy corns. The children predicted the candy corn would move up and down. What really happened was the waxy layer on the surface of the candy pulled away first and then melted away while using the hot water the fastest. Ask your child about it. It was Super cool!!!

Leaf rubbings
Squirrels
Elephant puppets
Easel painting
Green eggs and ham
